

# RIVER

**Voda za piće,  
idealno  
rješenje  
za svako  
okruženje**

**The perfect  
drinking-water  
solution  
for any  
environment**

**Mali troškovi  
upravljanja  
i  
održavanja  
sistema**

**Low  
management  
and  
maintenance  
costs**

**Voda se može  
piti direktno,  
iz čaše ili se  
može natočiti  
u bocu**

**To drink  
water directly,  
or into cups,  
or to fill  
bottles**

**→ Jak i pouzdan  
Reliable and rock-solid**

→ Idealno je rješenje za javne prostore, kao što su zračne luke, brodovi, tvornice, škole... Lako se spaja na vodovodnu instalaciju i pruža neograničavajuću količinu vode za piće. Veliki raspon modela, pogodni su i za usluživanje većeg broja korisnika. Higijena vode je zaštićena direktnim sistemom hlađenja, i ukoliko je potrebno, može se ugraditi filter za vodu.

→ The ideal solution for public spaces such as airports, ships, factories and schools, the River is easily attached to the mains and provides almost limitless quantities of fresh drinking-water. A wide range of models is available to cater effectively even to large numbers of users one after the other. The hygiene of the water is protected by the direct chill system, and if necessary, the River can be fitted with a filtration system.

Mod. River

# RIVER

## → Tehnologija i kvaliteta Hi-tech and high-quality

Ovaj model je dostupan i u zidnom modelu, kao i u podnom modelu.

→ Nema rezervoar, tako da voda ne stoji u njemu. Direktno je povezan na vodovodnu mrežu, te tako omogućava maksimalnu higijenu.

→ U modelima "25" i "50", ventilski kondenzator garantira bolje hlađenje čak i u okruženju koje je više zagađeno.

→ Filter za čišćenje dostupan je, te služi kako bi poboljšao okus i kvalitetu vode. Uklanja nečistoće, mirise i nepoželjne okuse. Ovaj filter je odobren od strane Ministarstva zdravstva i koristi uložak koji se lako mjenja.

The River is available in wall-mounted versions that deliver the same high levels of performance as the floor-standing models.

→ No tank, so no stagnant water. The direct connection to the water mains with stainless steel coil allows maximum hygiene.

→ The ventilated condenser in models River 25 and 50 guarantees better cooling and high performance even in the most critical environmental situations.

→ A chlorine filter/purifier is available to improve the taste and quality of the water. It eliminates impurities, odours and unpleasant tastes. This filter is approved by the Board of Health and uses a cartridge which is easily replaceable.

## → slavine / taps

### G61

Zakrivljena slavina sa mehaničkom kontrolom ručke. Može se piti direktno iz slavine ili iz čaše.

Curved tap with mechanical control lever. It allows to drink directly or with cup.

- River 15 • River 25 • River 50
- River AF 25 • River AF 50

### G62

Slavina sa mehaničkom tipkom za kontrolu, pije se direktno iz slavine.

Jet with mechanical pushbutton control to allow to drink directly.

- River 15 • River 25 • River 50
- River 25 UP • River 50 UP
- River AF 25 • River AF 50

### G62-G61

Slavina sa mehaničkom tipkom za kontrolu i zakrivljena slavina sa mehaničkom kontrolom ručke.

Combined mechanical pushbutton control jet and curved tap.

- River 15 • River 25 • River 50
- River 25 UP • River AF 25
- River AF 50 • River NF

### G63-G61

Slavina sa nožnom pedalom za kontrolu i zakrivljena slavina sa mehaničkom kontrolom ručke.

Jet with pedal control and curved tap with mechanical control lever.

- River 25 • River 50
- River AF 25 • River AF 50
